* SIPP-SF syntax: extracting the SIPP-SF from a SIPP-118 datafile (version June 2013)

* For any questions please contact SIPP@deviersprong.nl

* NECESSARY PREPARATIONS: name first sipp item sipp001, second sipp item sipp002, etc.
* values (and value label) for each item: 1 (fully disagree), 2 (partly disagree), 3 (partly agree), and
* 4 (fully agree).

* After recoding, lower levels refer to more maladaptive functioning (thus more pathological scores),
* while higher levels refer to more adaptive functioning (more healthy scores).
